[Logitech C925E Business Webcam](#)

Best Budget webcam with 1080p and integrated privacy shutter

[Logitech C930E Business Webcam](#)

Designed for business with 1080p webcam with wide field of view & digital zoom

[Logitech Bio Ultra HD Webcam](#)

4K webcam with 5x digital zoom & HDR

[Meeting Owl - 360 Webcam](#)

Can be used for witnesses and viewing who is in the room

Microphone

[Logitech Blue Microphone Yeti](#)

Switch it between 4 modes so you can use it for solo speaking, conference calls, in-person interviews and more.

You can adjust the volume, change how sensitive the mic is (gain control), and it comes with a sturdy base that allows the mic to be adjusted to the correct position on your desktop (every desk is different).

[Shure MV5-B-LTG Digital Condenser Microphone](#)

A good computer microphone and it is Apple MFi Certified. This means you can connect it directly to an iOS device without any adapters. It includes both a USB cable *and* a Lightning cable, so you don't have to worry about needing to buy a separate cable.

It includes a headphone jack for monitoring, 3 preset DSP modes, and it is small enough to carry with you. You can remove it from its stand and use it laying on a desk or table, making it even more portable.

[Blue Microphone Snowball](#)

The Blue Snowball is a quality budget microphone for your PC. You can choose between cardioid and omnidirectional (front and all directions, respectively) pickup patterns and the metal stand is adjustable to different heights.

Monitors

This is subject to the hardware you have and the home preference you have. Some cases require dual screens, some 3 to 4 screens. This can be achieved with multiple devices such as laptop or PC plus an iPad. Extra screens can also be achieved by connecting you laptop to a TV.

The selection of monitors below have at least 1x HDMI connection and also other means of connecting.

Dell SE2319H 23" FHD Monitor

Simple budget 23" FHD monitor with built-in speakers, 1x HDMI and 1x VGA port.

Dell U2419H 25" FHD Monitor

A 25" FHD monitor with 1x DisplayPort, 1x VGA, 1x HDMI and 1x USB-C that can also be used to charging supported devices (Certain MacBooks, iPads and Windows laptops)

Dell U2720Q 27" 4K UHD Monitor

Premium 27" monitor with a 4K UHD LED Backlit display (3840x2160) that can be swiveled, pivoted and tilted. This display has 1x HDMI and 1x USB-C that can also be used to charging supported devices (Certain MacBooks, iPads and Windows laptops)

Samsung SJ55W 34" Ultra-Wide LED Monitor

An ultra-wide 34" monitor with an LED backlit QHD display (3440x1440p) with 1x HDMI and 1x DisplayPort connection

Adapters

USB-C to HDMI Adapter

This adapter will allow you to convert your USB-C port into HDMI port to allow you to use any of the monitors listed above.

If your laptop has a DisplayPort port, and you need a VGA connector, please purchase:

DP to VGA Adapter

Or if you require a HDMI connection, please purchase:

DP to HDMI Adapter

The majority of new laptops should be able to display onto two monitors simultaneously. Please check what ports your laptop has before purchasing any monitors or adapters.
